GO FOODS and OUR HEALTH  
CIRCULAR NO. GR01-03\_2017\_04

---

\_\_\_\_\_, 2017

Dear Parents,

Starting this week, our children will be learning the following key concepts about Go foods:

- Go foods are also called energy-giving foods. They contain carbohydrates that give our bodies the energy we need to perform everyday activities, like walking, running, playing, studying or even staying focused in class.
- According to the "Pinggang Pinoy" guide, approximately one-fourth of our plate should consist of Go foods such as rice, bread, corn, pasta, noodles, *kakanin* and *kamote*.
- We should eat different kinds of Go foods that not only provide energy, but vitamins, minerals and fiber as well. For example:
  - Potato chips, cake, *pansit* and *kamote* are all energy-providing snacks, but *kamote* also has vitamins for good eyesight and *pansit* has vegetables for added vitamins and minerals.
  - We can eat white rice or brown rice during meals, but brown rice contains more fiber, which helps us to feel full. Fiber helps in regular bowel movement.
  - We should also go for whole grain products such as oatmeal and corn on the cob which contain fiber, vitamins and minerals.

We ask that you support your child's learning by:

- serving your child Go foods that are not just energy-giving, but rich in nutrients as well.
- ensuring that your child eats a nutritious breakfast in the morning and nutritious snacks to provide needed energy to fuel his or her activities.

Thank you for continuing to partner with us in developing healthy eating habits in your family!
