**SUSAN S. COLLANO**

Schools Division Superintendent

Officer-in-Charge

Division of Catanduanes

Virac, Catanduanes

Dear **Dr. Collano**,

Greetings from the Department of Information and Communications Technology (DICT) – Region V Catanduanes!

The ICT Literacy and Competency Development Bureau (ILCDB) of the Department of Information and Communications Technology (DICT) – Region V Catanduanes, will be conducting a webinar entitled **CYBERSECURITY COMPETENCY FRAMEWORK** on **November 28 – December 02, 2022 from 1:00 PM – 4:00 PM via Zoom**.

The training is about understanding what are the legal, management, and technical capabilities to deliver and support the key result areas of cyber security, and to control the information security risks of a business enterprise or government agency.

The enterprise and agency stakeholders have to be clear and definite about their mandated accountability and responsibilities to deliver the expected outcomes of the following:

1. Cybercrime prevention as described in R.A. 10175
2. National Cyber Security Plan as required in R.A.
3. Personal information security as enumerated in R.A. 10173

The leadership, management and personnel are expected to understand and use the legal and technical controls that are critical to prevent or respond to any form of cyber security threats. They must be able demonstrate the ability to assess security risks, to formulate security policies, to design security solution, to manage security incident, and to use security technologies.

The capability building on cybersecurity provides the foundational framework on what are considered by rules and standards as the valid concept, principles, organization, life cycle, process, documentation, metrics and technologies of securing the people, data, application and infrastructure of the enterprise or agency against cybercrime and data privacy breach.
