Supply-Demand Forecasting and Time Series Analysis using Spreadsheets and RStudio In-depth Training Workshop - October 18 to 20, 2023 (22 hours) via Zoom

How much demand must your organization or agency satisfy in a given day, week, month, or year? When will the supply run out?

In driving on the road prediction or forecasting is an essential skill to avoid accidents. An organization needs a capability in forecasting supply and demand and time series analysis so that it will lessen the waste, manage risks, and uplift the morale within the organization (although these are a few of many benefits of forecasting and time series analysis). All sectors (public, private, and academic) need to learn forecasting and time series analysis.

Hence, we invite you to join Supply-Demand Forecasting and Time Series Analysis using Spreadsheets and RStudio In-depth Training Workshop - October 18 to 20, 2023 (PHP3100.00 per participant) via ZOOM.

What you will learn:

1. Basic to advanced time series models
2. Predict how much demand or supply your agency needs to satisfy in a day, week, month, or year.
3. Predict and forecast using Spreadsheet and RStudio.

What you can forecast:

- Any supply
- Demand for your services
- Customers or students
- Cases of crime and diseases.
- Number of people who will walk or enroll in your agencies services.
- And many more.

98.6% of the participants who attended our Data Visualization using Spreadsheet and Fundamentals of Data Management using Spreadsheet said that the skills they acquired are helpful in their daily tasks in their organizations. This is a 22.5-hour workshop (8:30am to 4:00pm) via ZOOM.

To register (copy-paste the link to your web browser): <<<https://forms.gle/N6Qhca5C7uEGGned6>>>

Note: To access the course outline, description, and program of activities, send us an email.

More information (payment details and workshop inclusions): <https://forms.gle/ZMxvrKNSGzrY5gga7>

Thank you, and have a great year!

Regards,

STRAT One
