We are pleased to introduce to you our new training course entitled " Introduction to Information Security Management System (ISMS)" which can give a regular awareness training sessions to keep your employees be informed about emerging threats, new security policies, and best practices, ensuring that they remain-up-to-date and vigilant in the face of evolving risks. Given below is the training course outline, overview, objectives, modules, benefits and the tentative schedules :

TRAINING COURSE OUTLINE

Course Title	Introduction to ISMS (Information Security Management System)
Training Days	2 days – online (through Zoom)
Approach	Online learning/teaching with activities applicable for individual or group.
Target Audience	All employees of an organization, regardless of position or rank.
Training Category	Technical, Supervisory or Managerial

Overview

Employee awareness of information security is significant in safeguarding organization's sensitive data, mitigating risks, and maintaining compliance with relevant standards such as ISO, NIST, PCI-DSS and importantly regulatory frameworks like the Philippines DPA of 2012 and GDPR. Our employees handle sensitive data on a daily basis which include customer information, intellectual property and financial records so it is the paramount to provide proper education on appropriate handling procedures, secure communication process and minimizing risk of data breaches and unauthorized access.

A security breach can have serious consequences for an organization's reputation and brand image. By investing in employee awareness training, organizations demonstrate their commitment to protecting customer data and maintaining trust, which can help preserve their brand reputation in the event of a security incident.

Fostering a culture of security awareness promotes a collective responsibility for information security throughout the organization. When employees understand their role in protecting sensitive information and the importance of security into their day-to-day operations, we are empowering our employees to be proactive and quick to respond to any possible security threats which may be significant help to strengthen our overall security posture.

Training Objectives

- A. Understand the components and the operation of an Information Security Management System based on ISO 27001 and its principal processes.
- B. Develop capability to protect organization's assets, data and financial resources against potential security threats.
- C. Minimize the risk of security incidents by understanding concepts, approaches, standards and methods of implementing ISMS.

Training Modules

Day 1 – 7.5 hours	Day 2 – 7.5 hours
➤ Fundamental Principles of Information Security	➤ Policies for Information Security

<ul style="list-style-type: none"> ➤ ISMS Standards, Concepts & Techniques ➤ Introduction to ISMS Risk Assessment 	<ul style="list-style-type: none"> ➤ ISMS Metrics ➤ ISMS Internal Audit
---	---

<p>Benefits</p> <ul style="list-style-type: none"> ✓ Employees are constantly or oftentimes the first line of defense against cyber threats such as phishing attacks, malware, and social engineering. Their awareness and vigilance can prevent security incidents before they occur, significantly reducing organization's exposure to risks. ✓ Regular awareness training sessions keep employees informed about emerging threats, new security policies, and best practices, ensuring that they remain-up-to-date and vigilant in the face of evolving risks. ✓ Implementing and maintaining ISMS and achieving regulatory compliance can lead to long-term cost savings
